

# DANIEL O. SCRIMAGLIA

Hello, I'm Daniel. First of all, thank you for taking a few moments for reading my Curriculum Vitae.

I have 14 years of experience in tech journalism at the main news TV station in Mendoza, Argentina.

I also have my own startup based on 360° images and software that allows me to work with a variety of brands and agencies, both big and small.

## A LITTLE ABOUT ME

<b>AGE</b> 42 years old	<b>COUNTRY</b> Argentina	<b>EMAIL</b> danielscrimaglia@gmail.com
<b>PHONE</b> +5492614688799	<b>YOUTUBE</b> @Scrimaglia	<b>WEBSITE</b> Inmoramica

## RELEVANT DATA

<b>FAMILY GROUP</b> 4 members	<b>RESIDENCE</b> Flexible	<b>WORK TRAVEL</b> Flexible
<b>CHRONIC DISEASES</b> None	<b>SURGICAL PROCEDURES</b> None	<b>MEDICATION</b> None

## MY EDUCATION

 <b>2000 - 2006</b> Universidad Tecnológica Nacional Electromechanical Engineering
---

I started my studies at the engineering career early in the new millennium. I have been putting off finishing my education because of a number of personal and financial issues, but I am now pursuing it again. Out of 50 classes, I only need to take six to get my engineering degree. As a result, I view myself as an advanced student.

 <b>1995 - 1999</b> Liceo Agrícola y Enológico Oenologist and Agricultural Technician
--

## MY EXPERIENCE

 <b>2016 - PRESENT</b> Founder Inmoramica
--

After viewing Google Street View over ten years ago, I became interested in creating 360-degree footage on my own. I had no prior experience with 360-degree photography or video, so I had to start from zero. I currently employ five people to handle a variety of panoramic services, including video, photography, 4K livestreaming, and unique software-powered virtual tours.

I have spent the last four years creating a road survey system based on GPS data and 360° video. I had to learn Python to write my own unique program to make it work. However, my greatest accomplishment in this field is the software I developed, which lets us map street illumination levels at large scale. We mostly sell this products to government organizations, and which lets us map street illumination levels.

Without a question, the drive to explore, discover, and create new things makes this trip the most interesting one.

 <b>2010 - PRESENT</b> Tech journalist Canal 9 Televida
--

By the end of 2010, I had received an invitation from the general manager of Mendoza's primary TV station to speak about technology on one of their news programs. One of my primary responsibilities ever since the organization hired me for frequent presentations following the initial test is giving live presentations. I had to pick up a number of television-related skills on my own and through company-provided training.

Choosing which tech news to air, expert broadcast-quality video and sound editing, and live presentation on the station's TV set are all part of my job. I had to learn how to utilize the Adobe Suite (Photoshop, Lightroom, and Premiere Pro) in order to obtain the best results.

 <b>2014 - PRESENT</b> Tech journalist Radio de Cuyo SA
--

Twice a week, at the most challenging hour of the radio schedule, I take part in the "Opinion" show early in the morning. We discuss the most recent tech news on the air with the whole staff.

 <b>2014 - PRESENT</b> Tech journalist Diario El Sol
---

Every day, I have to pick, compile, and write the latest tech news for this job. I can work from any location in the world remotely.

 <b>2009 - 2015</b> Tech support and Commercial Consultant BlackBerry
--

This was the greatest job experience I have ever had. My primary responsibilities involved supporting the Movistar enterprise team in their sales of BlackBerry goods and services. Both technical and commercial knowledge were needed.

I received frequent training, appropriate attire, the newest equipment, and an excellent compensation from the employer. These qualities, which are in my opinion the foundation of a successful business, are uncommon in Argentina.

This experience was really motivating, in my opinion, because of the way things were changing—new clients, new items, new individuals. I must admit that I'm incredibly appreciative and proud of this opportunity.

## LANGUAGES & OTHER SKILLS

SPANISH - Native level	94%
ENGLISH - Advanced level	73%
COMMUNICATION	44%
CODING - AI Assited	34%

## WHAT I LOVE TO DO AT WORK

 <b>TECH SUPPORT</b> I think that helping other people fix problems is one of the most important services a company can offer.	 <b>DEVELOPMENT</b> It takes a lot of time, learning, sacrifice and creativity for creating a functional software that meets the customer needs.	 <b>SALES</b> This process involves detailed technical knowledge of the products and advanced skills in the social field.
---	---	--

## PERSONAL FAVS

 <b>TRAVEL</b> I love taking family road trips occasionally and they're a terrific experience.	 <b>MUSIC</b> I'm a songwriting and guitar player. I used to perform a variety of musical genres in a band.	 <b>SPORTS</b> Like almost any other Argentinian, I enjoy playing soccer, but I also love to play paddle and basketball.
---	--	---

## THANK YOU FOR READING MY CV
